

## **FACT SHEET**

### Wastewater Line Replacement

The Miami-Dade Water and Sewer Department (WASD) has embarked on a Capital Improvement Program to provide necessary upgrades to the water and sewer infrastructure to continue providing high quality services, protecting public health, and the environment. One of these projects is a new wastewater pipeline in your neighborhood. This project is part of the Consent Decree Program which requires several operational and maintenance improvements to Miami-Dade's wastewater system.

On April 9, 2014, the United States District Court for the Southern District of Florida authorized a Consent Decree between Miami-Dade County, the United States of America, the State of Florida, and the Florida Department of Environmental Protection, for improvements to the County's wastewater collection system. The rehabilitation of wastewater lines for Consent Decree project 4.5 (1) is part of this program.

#### PROJECT INFORMATION / SCHEDULE

Construction of the new pipeline is expected to begin in January 2017 and expected to be completed in eleven months. Construction work will take place during the week from sunrise to sunset. The contractor will take additional steps to minimize impacts, but you may experience some noise and intermittent traffic inconvenience due to lane and road closures or detours. At the conclusion of the project, the roadway areas impacted by the construction will be restored. We thank you for your continued support.

#### **PROJECT AREA**

# Project at a Glance

Project Number 4.5 (1)

- Installation of 4.1 Miles of 54-inch wastewater line from SW 280 Street and SW 127 Avenue to SW 248 Street and 107 Avenue by method of open trench and trenchless technology.
- Installation of 1,378 linear feet of 54-inch wastewater line by method of micro tunneling under the Florida Turnpike at SW 112 Avenue.
- Replacement of a 24-inch wastewater line with 54-inch wastewater line by open cut along Coconut Palm Drive between SW 112 Avenue and SW 107 Avenue.
- The upgrade will not affect the water or the wastewater services in your area.
- There may be temporary lane closures or detours. Access to your property will always be granted.
- The areas surrounding the construction will be restored at the conclusion of the project.
